Dance and Choreography

How can dance help us become healthier, more confident, and more connected with others.

- Dance is movement with purpose
- Choreography organizes movements in a meaningful sequence
- A good performance values safety, teamwork, effort and expression

Understanding Dance Elements

Dance

- a planned or expressive movement of the body, usually connected to rhythms, music, feelings, or ideas

Choreography

- the art of arranging movements into a sequence, using counts, formations, transitions, and expression.

WHY DANCE MATTERS FOR HEALTH?

A. Physical Wellness

- improves coordination, balance, flexibility, posture, cardiovascular endurance, and body control

B. Mental and Emotional Wellness

- helps reduce stress, increase confidence, and support self-expression through movement.

C. Social Wellness

- builds cooperation, respect, trust, communication and a positive group performance culture

Five Basic Elements of Dance

BODY- what body parts move?

ACTION- what movements are done?

SPACE- where does the body move?

TIME- how fast or slow?

ENERGY- what quality or force?

BODY

- head, shoulders, arms, hands, torso, hips, legs, feet, or whole body
- movement may be isolated, connected, symmetrical, or asymmetrical
- a choreographer chooses body parts intentionally to show meaning, style, and control

ACTION

- locomotor actions move the body from one place to another: walk, run, slide, hop, leap
- non-locomotor action happen in place: bend, stretch, twist, sway, turn, reach
- repeated actions become movement or phrases

SPACE

- direction: forward, backward, sideward, diagonal, circular
- level: low, middle, high
- pathway: straight, curved, zigzag, circular
- formation: line, circle, v-shape, diagonal, scattered, pairs
- safety reminder: spacing prevents accidental collisions

TIME

- beat is the steady pulse learners can count or clap
- tempo is the speed: slow, moderate, or fast
- counts help group move together, 1-8, then repeat
- pause, accent, and repetition make choreograph clearer

ENERGY

- energy may be sharp, smooth, heavy, light, strong, soft, sudden, or sustained
- affects emotion and meaning in performance
- the same action can feel different when energy changes

DANCE GENRES AND STYLES

Philippine Folk Dance- often connected to tradition, community, and cultural identity

Festival Dance- energetic, colorful, and usually performed in celebration

Hiphop/popular Dance- often uses strong rhythm, body isolations, and current trends.

Contemporary Dance- may use expressive, fluid and interpretive movement

STYLE CHOICES MUST REMAIN SCHOOL APPROPRIATE AND SAFE

PHILIPPINE FOLK DANCE

WHAT IS DANCE?

- a form of expression of oneself through rhythmic movement

FOLK DANCE

- the oldest form of dance and the earliest form of communication
- the traditional dance of a given country which evolved naturally and spontaneously with everyday activities
- e.g. occupations, customs, festivals, rituals
- It is handed down from generation to generation
- It has more or less a fixed movement in their pattern, but may differ in various areas or provinces

5 Major Classifications of Philippine Folk Dances

Cordillera Dances

- Dances reflects rituals which celebrate their daily lives – a good harvest, health, peace, war, and other symbols of living

- “Siesgo” – A-line skirt

CHEERDANCE

- Is coined from the words, CHEER and DANCE.
- To cheer is to shout out words or phrases that may help motivate and boost the morale of a playing team and perform better during a game.
- Dance, on the other hand, is a physical activity where one expresses emotions or gestures while performing bodily movements usually in time with rhythm.
- Cheerdancing rooted from cheerleading performance of a routine, usually dominated by gymnastic skills such as jumps, tumbling skills, lifts and tosses combined with shouting of cheers and yells to lead the crowd to cheer for a certain team during a game or sport.

HISTORY

- Ivy league college sporting events. –
- Cheerleading/Cheerdance originated in USA. In the 1880s at Princeton University, Thomas Peebles together with other students supported a local American Football team w/ cheers.
- On 2 November 1898, standing in front of a crowd of sport fans, Johnny Campbell, a medical student, started conducting the cheer on the spur of the moment. He was so effective that the team won and he made history as the first cheerleader.
- Today, cheerdancing is identified as one of the most spectacular events in one of the biggest collegiate sports events in the country, the UAAP (University Athletic Association of the Philippines).
- It might hard to believe that the first cheerleading was mainly performed by men. It was not until World War II that women dominated this activity.
- 1923, at University of Minnesota, Women participated. Since then, nearly 90% of competitions have been girls.
- In the year 1951 after the war, National Cheerleaders Association was established and the founder is Laurence "Herkie" Hurkimer.
- 1965, Fred Gastoff invented the Vinyl pom-pom.
- The Dallas Cowboys Cheerleaders soon gained the spotlight with their revealing outfits and sophisticated dance moves, debuting in the 1972–1973.

- In 1970 they established cheerleaders as "American Lion of Wholesome sex appeal."
- In 1980s is the beginning of modern cheerleading. The Baltimore Colts cheerleading group, formed in 1960, was the first professional team
- From the 1970s on, the popularity of cheerleading continued to rise, and the female dancers acted as supporters not only for American football or basketball teams, but also swimming and track-and-field competitors.
- In the 1980s and the 1990s, cheerleading started gaining popularity in various other countries, such as Japan, Chile, The United Kingdom, Germany and in Scandinavia. This discipline started to flourish in the USA as well, as evidenced by the massive number of competitions held nearly every weekend in many American towns and cities.

LEGS/FEET POSITIONS

- Feet Together
- Feet Apart
- Dig (front and side)
- Hitch, Liberty, and Scale
- Lunge (front and side)
- Knees and Hips positio

ARMS/HAND MOVEMENTS

- Beginning stance and cheer stance
- "T" and half "T" positions

- Touchdown, low touchdown
- High "V" and low "V"
- Tabletop and punch, etc. "L" and diagonal positions

CHEERDANCE BASICS (GYMNASTIC SIDE)

- JUMPS
- Tuck Star/spread eagle
- Pike
- Split
- Hurdle Jump/Hurkie
- Toe Touch Jump
- Pyramids
- Composition: Flyer Base Spotter
- Levels: One-and-a-half high
- Two-high
- Two-and-a-half high

STEPS IN EXECUTING A PYRAMID

- Setting up (Preparing to lift)
- Load (Actual lift)
- Hit (Striking for a final pause)
- Dismount (To move down by the flyer)

CHEERDANCE BASICS (DANCE SIDE)

- Hip Hop Basics
- Bounce (Downrock)
- Groove (Toprock)
- Power moves: – Pump – Lock – Point – Curl
- Freezes Jazz/Classical Dance Basics:

Tendu (point)

Plié (knees slightly bent)

Grand Plie (full knees bent)

Releve (heels raised)

Pique (Raising a knee)

Battement (Kicks)

Ball Change and Chassé

Pirouette and Chainé (Turns)

CHEERDANCE BASICS (CHEER SIDE)

- Cheering is the very essence of cheerdance performances. To cheer is to make someone or a team motivated and encouraged. It boosts, salutes or acclaims the morale of individuals and teams. In cheerdance, cheering needs to be strong, loud, and metered so that it will be delivered in time with rhythm or the music played.
