MEDIA AND INFORMATION LITERACY

Introduction to Media, Information Literacy

Communication

- purposeful exchange of information and messages between people or groups of people speaking, writing, gestures, and signs.

Messages

- any form of communication (information, feelings, and ideas) passed or transmitted using a channel.
- Turov (2007), described them as a collection of symbols that appear purposefully organized (meaningful) to those sending or receiving them

Media

- methods or tools in which information can be exchanged and facilitated

Communication

- systematic process of using symbols in exchanging thoughts and ideas

Impersonal Communication

- refers to the communication refers between two persons, whether they are verbal or non-verbal

How Communication is Influenced by Media and Information

A. Communication

- the process of sending, receiving and understanding
- ex. talking to a friend, sending a text message, posting on social media, watching the news

B. Media

- refers to the channels or tools used to communicate information
- ex. television, radio, newspapers, facebook, tiktok, youtube, websites, messenger
- Key Idea- media is the channel through which messages

C. Information

- refers to facts, ideas, knowledge, or messages communicated to people
- ex. news reports, weather updates, school announcement

D. How Media Influences Communication?

1. Making Communication faster
2. Reaching Larger Audiences
3. Connecting People across distances
4. Using Different formats
5. Influencing People's Thoughts and Actions

E. How Information Influences Communication because it:

1. Previous topics for discussion
2. Helps people make decisions
3. Encourages people to act

- ex. if people receives information about an approaching typhoon, they may prepare emergency supplies and stay indoors

F. Advantages and Challenges of Media in Communication

Advantages

- Fast communication
- Easy access to information
- Wider audience reach
- Better activity

Challenges

- Spread of misinformation
- Fake news
- Misunderstood messages
- Information Overload

Media Literacy

- the ability to access, analyze, evaluate, create and act using all forms of media
- ex. "a student watches a Facebook video and evaluates whether the content is biased or credible
- key question: "what is the purpose of this media message?"

Information Literacy

- the ability to identify, locate, evaluate and effectively use information
- ex. "a student verifies information from multiple sources before using it in a research paper
- key question: "is this information accurate and reliable?"

Technology Literacy

- the ability to use technological tools effectively, responsibly, and ethically.
- ex: "a student uses Google docs, canva, and email to complete school requirement
- key question: "can i use this technology to complete school requirement?"

LITERACY	MAIN FOCUS
Media	Understanding media messages
Information	Evaluating information
Technology	Using technological tools

MEDIA AND INFORMATION LITERACY

Responsible Use of Media

Different Aspects

- Ethical
- Being respectful
- Safe
- Legal
- Accurate

Evolution of Media

TRADITIONAL MEDIA

- One-way Communication
- Information controlled by organizations
- Limited audience participation
- Ex. newspapers, magazines, radio, television

NEW MEDIA

- Interactive
- Fast
- Accessible anytime
- Everyone can create content
- Ex. Social media, blogs, podcasts, websites, streaming Philippines

Negative effects of Media

- fakenews
- cyberbullying
- screen addiction
- cancel culture
- spread of misinformation

Positive effects of Media

- faster communication
- greater access to information
- cultural change
- educational opportunities
- citizen journalism

How Media Shapes Values and Norms

Traditional Media	New Media
• Respect for authority • Family viewing • Community-centered culture • Verified information	• Freedom of expression • Personalized viewing • Global Culture • User-generated information

Traditional Media	New Media	Other negative values
• Discipline • Respect • Patience • National Identity	• Creativity • Individuality • Inclusivity • Global awareness	• Instant gratification • materialism • seeking online validation

MEDIA AND INFORMATION LITERACY

Media Codes and Conventions

- A media and information literate individual is a competent producer of media and information
- using inappropriate media language might result in misinterpretation of miscommunication

Media and Information Language

- is the way in which the meaning of a media text is conveyed to the audience. It is conveyed through media codes and conventions

Media Codes

- the system of signs and symbols in media

Media Conventions

- refer to the generally accepted ways of presenting messages in media

Signs and symbols in media texts are “polysemic” meaning they are open to many interpretation

Use appropriate languages (sign, symbols, and conventions) in media

Genre

- refers to a class or category of artistic endeavor having a particular form, content, technique, or the like.

3 types of Media Codes

1. Symbolic Code

- social in nature
- these codes live outside the media products themselves, but would be understood in similar ways in the real life of the audience
- *examples: if you see a character giving a red rose to another character in a film, you would assume that there is a romantic relationship between them*

It includes:

A. Setting

- is the time and place of the narrative. Your setting must always fit your message

B. Mise-en-scene

- is the description of all the objects within a frame of the media product and how they have been arranged
- includes set design, make-ups, costumes, accessories, and props

C. Acting

- actors portray characters in media products and contribute to character development, creating tension or advancing the narrative
- the actor portrays a character through appearance, movements, gestures, facial expressions, and vocal delivery.

D. Color

- every color elicits a different and unique emotional response in the viewer, thus when you produce media, you have to be clever with your color choices

List of colors and the emotions that it may evoke

- **Red-** passion, strength, power, danger
- **Green-** safety, healing, money
- **Blue-** stability, trust, health
- **Yellow-** happiness, intellect
- **Orange-** joy, enthusiasm, encouragement
- **Brown-** confidence, casualness
- **Gold-** wealth, prestige, wisdom
- **Purple-** power, luxury, ambition
- **Pink-** feminism, romance
- **Black-** power, elegance, mystery, death
- **White-** purity, perfection, safety

2. Technical Code

- refers to the ways in which equipment is used to tell the story

It includes:

A. Camerawork

- refers to how the camera is operating, positioned and moved for specific effects.

CAMERA SHOTS AND CAMERA MOVEMENTS

1. Extreme Close-up

- frames the subject precisely to emphasize the specific portions of the body
- it is often used to reveal horror in a subject like an

2. Close-up shots

- frames the subject at a close range to show a detail
- this shot is tightly frame a character's face in order for the audience to see what type of emotion is being conveyed

3. Medium Shot

- is a type of camera shot that shows an actor approximately from the waist up
- this is used if the person is doing something with their hand movements

4. Long shot/wide shot

- is oftentimes used as an establishing shot in films as it normally sets the scene in the character's place within it.

BASIC CAMERA ANGLES

1. Eye Level Shot

- this is when your subject is at eye-level
- can result in neutral perspective, not superior or inferior
- this means how we see people in real life, our eye line connecting with theirs it can break down boundaries

2. Low-angle shot

- frames the subject below their eye line
- these camera shots most often emphasize power dynamics between characters
- are a perfect camera angle for signaling superiority or to elicit feelings of fear and dread

MEDIA AND INFORMATION LITERACY

4. Over the shoulder shot

- is a camera angle used where the camera is placed above the back of the shoulder and head of the subject
- most commonly used to present a conversational back and forth exchange between two subjects
- this connotes a closer relationship between the two characters

4. High angle shot

- the camera points down at your subject
- it usually creates a feeling of inferiority or looking down on your subject
- is a versatile shot that can be used in many situations
- the most common usage is to make a character seem vulnerable and powerless, but there are always exceptions to the rule

5. Ground level shot

- when your camera height is at ground level with your subject
- is used a lot to feature a character walking without revealing their face, but it can help to make the viewer more active and use actor's performance to build an idea

6. Dutch Angle shot

- the camera slanted to one side
- with the horizon's lines, you can create a sense of disorientation a destabilizes mental state, or increase the tension

MASSIVE OPEN ONLINE COURSES (MOOCs) and MASSIVE OPEN ONLINE PLATFORMS (MOOPs) MOOC

- an online course designed for unlimited participation through the internet
- people can study without attending a traditional classroom
- provides: video lectures, readings, quizzes, assignments, discussion forums, certificates
- examples: Coursera, edX, Khan Academy, FutureLearn, Alison

Massive

- thousands-even millions-of learners can enroll
- examples: a programming course in Coursera may have over 500,000 students from different countries

Open

- anyone can enroll regardless of age, nationality, or educational background
- many courses are free but not all

Online

- everything happens through internet
- students can learn using laptops, tablets, or smartphones

Course

- unlike random youtube videos, MOOCs follow an organized curriculum with lessons, assessments, and certificates

Advantages of MOOCs

1. Accessible Education

- students from remote areas can learn from world-class universities
- ex: a grade 12 student in Isabela learns Data Science from Harvard through edX

2. Flexible Learning

- students study anytime and anywhere

3. Affordable

- many MOOCs are free
- certificates are optional

4. Lifelong Learning

- professionals continuously improve their skills

5. Career Opportunities

- refers to how the camera is operating positioned and moved for specific effects.

Limitations of MOOCs

- requires internet connection
- requires self-discipline
- limited face-to-face interactions
- high dropout rates
- some certificates require payment

MOOP

- are online spaces where millions of people communicate, collaborate, create content, conduct business, and share information
- unlike MOOCs, which are designed specifically for learning, MOOPs serve many purposes such as communication, entertainment, commerce, and collaboration
- ex: facebook, tiktok, youtube, instagram, google docs, zoom, shopee, lazada

Types of MOOPs

- Social Networking: Facebook, Instagram, Threads
- Communication: Messenger, WhatsApp, Telegram
- Collaboration: Google Workspace, Microsoft Teams, Zoom
- Video Sharing: Youtube, Tiktok
- E-Commerce: Shopee, Lazada, Amazon

Positive Impact of MOOPs

- Communication: people communicate instantly across the world
- Information Sharing: news spread quickly, educational content becomes accessible
- Business: people earn income online, small business reach larger markets
- Creativity: content creators showcase talents
- Collaboration: students collaborate on research despite being in different locations

MEDIA AND INFORMATION LITERACY

Negative Impact of MOOPs

- Fake News- information spreads rapidly-even false information
- Cyberbullying- online harrassment affects mental health
- Privacy Risks- personal information may be stolen
- Online Addiction- excessive screentime affects health and academic
- Misinformation- users sometimes share inaccurate information without verification

MOOC	MOOP
focuses on learning	focuses on interaction and services
structured course	open platform
has lessons and assessments	users create and share content
teachers guide learning	users interact freely
examples: Coursera	example: facebook
